# Small Business Seminars 2007

## Pricing Small Business Products

- Pricing your products and services profitably is one of the major reasons for the success of the venture. Many small businesses fail because they do not know how to price products or services correctly.
- You must know the market for your product or service, what the competition is and how the product will be delivered in order to price it effectively.
- This workshop will discuss pricing and the effects on your business.

*S.C.O.R.E. offers self-employment seminars in partnership with the WWU Small Business Development Center.*

**Seminars require advance registration, with a minimum of 12 participants for each seminar.**

**Location:  
WorkSource  
Whatcom,
